## Value-Based Care Services

### Thrive Under Value-Based Reimbursements

Outcome-based reimbursements demand redesigned care delivery and more comprehensive care management models. Now is the time to start building.

Cognizant's Value-Based Care (VBC) Services enables providers to create successful strategies for improving the quality of care while managing the increased financial risk of value-based reimbursements. Our wide range of capabilities help providers implement next-generation digital technologies, new clinical and financial analytics solutions, and redesigned models of care.

#### Complete Portfolio of Value-Based Expertise

Cognizant's team of clinicians, data scientists, anthropologists, healthcare revenue cycle specialists and digital transformation experts can help providers design, build, implement and scale value-based initiatives. Cognizant's VBC Services

Value-Based Care Services offer providers a wide range of services that deliver such benefits as:

- Agile and flexible population health capabilities that incorporate platforms, processes and people with value-based care strategy and population health management services.
- Ability to build, scale and execute successfully in value-based care contracts with financial and reimbursement advisory services.
- Improved patient experiences with integrated, holistic care and engagement models with patient experience design and implementation capabilities.
- Reduced costs, improved quality and access to care with next-generation care management incorporating remote patient monitoring, AI and chatbots through care model design and implementation.
- Powerful information infrastructure that integrates clinical, administrative and other data sources and finds insights in this data for managing financial and clinical risk using sophisticated analytics through VBC technology advisory services.

helps providers at all stages of their evolution to value-based care.
