

Data Sheet

TriZetto® CareAdvance Enterprise

Integrated claims. Streamlined workflow. Coordinated care.

The TriZetto® CareAdvance Enterprise® solution delivers:

- An advanced population health management system for case, disease and utilization management for members across the care continuum on a single platform
- Productized pre-integration with TriZetto® Facets® & TriZetto® QNXT™ core systems enabling streamlined disease, case and utilization management
- Extensive integration support for non-TriZetto core administration platforms
- Continuity of Care Document Member Summary-enabled
- Automated and real-time utilization management
 - Simplified mouse and menu design and promotion of utilization management business rules
 - Flexible design includes ability to create native and/or custom utilization management business rules
- Integrated clinical-decision support tools: MCG Health, LLC and Change Healthcare InterQual®
- Integrated health education: Healthwise® Knowledgebase

In order to realize the cost savings and quality improvement potential of care management programs, payers need efficient, thoughtfully integrated applications that connect care managers to members and providers.

- Enhanced analytics rules engine
- Automated correspondence
- Assignment pages designed to support turnaround time
- Calendar view to display your tasks by day, week, work week, agenda or month
- Integration with user-ready clinical content including preconfigured care management identification rules with assessments and care plan guidelines

CareAdvance Enterprise provides a single platform that transforms population health management into a data-driven enterprise activity. Streamlining disease, case and utilization management allows health plans to deliver targeted health information and wellness campaigns more effectively, while getting the most out of interactions with members and providers.

CareAdvance Enterprise is part of the Cognizant line of TriZetto® Healthcare Products—a portfolio of software products that help healthcare organizations enhance revenue growth, drive administrative efficiency, improve cost and quality of care and improve the member and patient experience.

CareAdvance supports compliance requirements and simplifies workflows and processes for care and population health management. Providers and their staff gain extensive utilization management automation with clinical support, while members have access to care information via a secure web portal.

Connecting care managers to advance outcomes

Key Benefits

Create more efficient workflows

Advanced population health management capabilities provides faster, streamlined workflows:

- I Consolidated application screens allow easy navigation and access to important member information—providing care managers with a comprehensive picture of a member's health
- I Member timeline displays comprehensive view of member information in chronological order in one view. Timeline can also include external data from other sources. An API is provided for plans that wish to use timeline outside the application.

- I An intuitive interface provides the ability to access multiple screens without losing work and information gathered during member assessment and interactions.
- I An analytics rules engine offers greater specificity in member identification and rules authoring for fewer false positives.
- I Configurable security permits various levels of authorized access to member profiles and information to be assigned.

Improve clinical outcomes and costs

Drive improvements to care management program delivery with advanced analytics and reporting that provides:

- █ Accurate forecasting, identification and stratification of members
- █ Standard and customized reporting functionality
- █ An **open-analytics platform** that can be custom integrated with any advanced analytics solution

Connect and engage your providers

Deliver real-time services to provider communities through integration with Cognizant's web services, which facilitates health plans:

- █ Automating labor-intensive and time-consuming utilization management processes for providers
- █ Engaging providers at the point of care with rule-based guidelines to gauge appropriate medical need
- █ Analyzing user-created and standard authorization questions using configurable rules for higher levels of automation and reduced manual intervention

Reach your objectives faster

In addition to TriZetto® CareAdvance Enterprise®, we offer an extensive line of solutions and services that harness the power of digital to optimize your business. Achieve new levels of performance and efficiency with Digital Business, Digital Operations and Digital Systems and Technology capabilities from Cognizant.
